SUMMARY

I'm a motivated Full Stack Web Developer (Fresher) with hands-on experience in Python, MySQL, HTML, CSS, JavaScript, and Bootstrap. I've built responsive static websites and connected them with backend databases. I genuinely enjoy writing clean, efficient code and love exploring new technologies. I'm always eager to learn and excited about creating web applications that are not just functional, but scalable and user-friendly.

PROJECTS

◆ Krishco Engineers Pvt. Ltd. – Corporate Website

Live: krishco.com

- Role: Frontend Developer + API Integration (Helper)

Tech Stack: HTML, CSS, JavaScript, Bootstrap

- Designed and developed a modern, fully responsive corporate website with a clean UI and cross-browser compatibility.
- Ensured high accessibility and seamless UX across devices, following industry-standard UI/UX practices.
- Emphasized performance, design consistency, and smooth user interactions.
- Assisted in integrating frontend forms with backend APIs to ensure dynamic content rendering and functional interactions.

◆ Rays Renewal Solar Energy Pvt. Ltd.

Live: raysrenewalsolar.com

Tech Stack: HTML, CSS, JavaScript, Bootstrap

Built a responsive and user-centric website with a clean layout and intuitive navigation.

Implemented Bootstrap components to maintain consistency in branding and visual structure.

Collaborated with the team to refine UI elements and optimize call-to-action placements.

◆ Supermarket Management System (Learning Project)

- Tech Stack: Python, MySQL, HTML, CSS, JavaScript, AJAX, jQuery
- Built a practice-based supermarket management web app during learning phase to understand full-stack CRUD operations.
- Focused on core modules like product inventory, employee records, and supplier management.
- Implemented AJAX-based form interactions for better UX and real-time data handling.
- Strengthened skills in backend integration and UI behavior using jQuery and Python logic.

◆ ToolMitra – Multi-Utility Web Tool Platform (Personal Project)

Tech Stack: Django, HTML/CSS, JavaScript, PIL/OpenCV, Tailwind

Built an all-in-one platform offering image enhancer, background remover, resizer, image stamper, and compressor tools.

Integrated image processing using PIL/OpenCV and enabled download-ready outputs.

Focused on user simplicity, performance optimization, and responsive tool interfaces.

Tech Stack: HTML, CSS, JavaScript, Bootstrap

- Designed and developed a modern, fully responsive corporate website.
- Focused on clean UI, cross-browser compatibility, and device responsiveness.
- Prioritized accessibility, user experience, and visual consistency following modern UI/UX standards.
