

ADITYA KUMAR Full stack developer

OBJECTIVE

As a passionate and eager-to-learn fresher, I am seeking a Full Stack Developer role to kickstart my career in software development. I have recently completed my academic training, where I gained a solid understanding of both front-end and back-end technologies. My technical skills include proficiency in HTML, CSS, JavaScript, and front⊠end frameworks such as React, as well as back-end technologies like Python and Django I am also comfortable working with databases such as MySQL, and have experience integrating APIs and ensuring seamless communication between the server and client sides of applications. I am deeply motivated to contribute to building dynamic, user-centric applications while enhancing my skills in a professional setting. I believe my strong problem-solving abilities, attention to detail, and passion for coding will enable me to make a meaningful impact. I am also excited about the opportunity to collaborate with senior developers and learn from their experience to improve my technical knowledge and approach. In addition to my technical skills, I possess excellent communication and teamwork abilities, which will allow me to thrive in a collaborative environment. I am committed to continuously learning and growing in the fast-paced world of full-stack development, and I look forward to contributing to the success of your team and projects.

PROJECT AND WORK

- Project Overview: Created a demo e-commerce website to showcase product listings, a shopping cart, and order management functionalities, providing a comprehensive experience for online shopping
- Front-End Development: Designed and implemented a responsive and intuitive user interface using HTML, CSS, JavaScript, and React ensuring compatibility across
- Dynamic UI: Utilized JavaScript to create interactive elements such as product filtering and sorting, enhancing the user experience and making it easier for customers to find desired products.
- Back-End Setup: Developed the server-side functionality using Python, and Django implementing business logic and handling user requests efficiently. This allowed seamless interaction between the front-end and back-end components.
- Database Integration: Integrated MySQL to store product information, user data, and order details, ensuring secure and reliable data management.
- Authentication: Implemented user registration and login functionality using sessions for secure user access, ensuring privacy and safety.
- Product Management: Developed CRUD (Create, Read, Update, Delete)
 functionality for managing products, allowing easy addition, updating, and removal of product listings from the database.
- Shopping Cart: Built a dynamic shopping cart feature that allows users to add, remove, and view items before proceeding to checkout, ensuring an interactive shopping experience.
- Version Control: Used Git for version control to manage project changes, maintaining code integrity and facilitating team collaboration.
- Demonstration: Provided a live demo of the application, showcasing full-stack/ functionality, real-time updates, and a fully integrated excommerce experience
